

Building/Area:
 All buildings. All areas.
 Application:
 Energy management for small and medium size buildings.

Monitor and understand your building energy usage.

Implement basic load control and scheduling.

User benefits

- > Understand energy usage.
- > Identify most profitable cost saving investments.
- > Improve operation and maintenance efficiency.
- > Save money: up to 15% achievable savings.

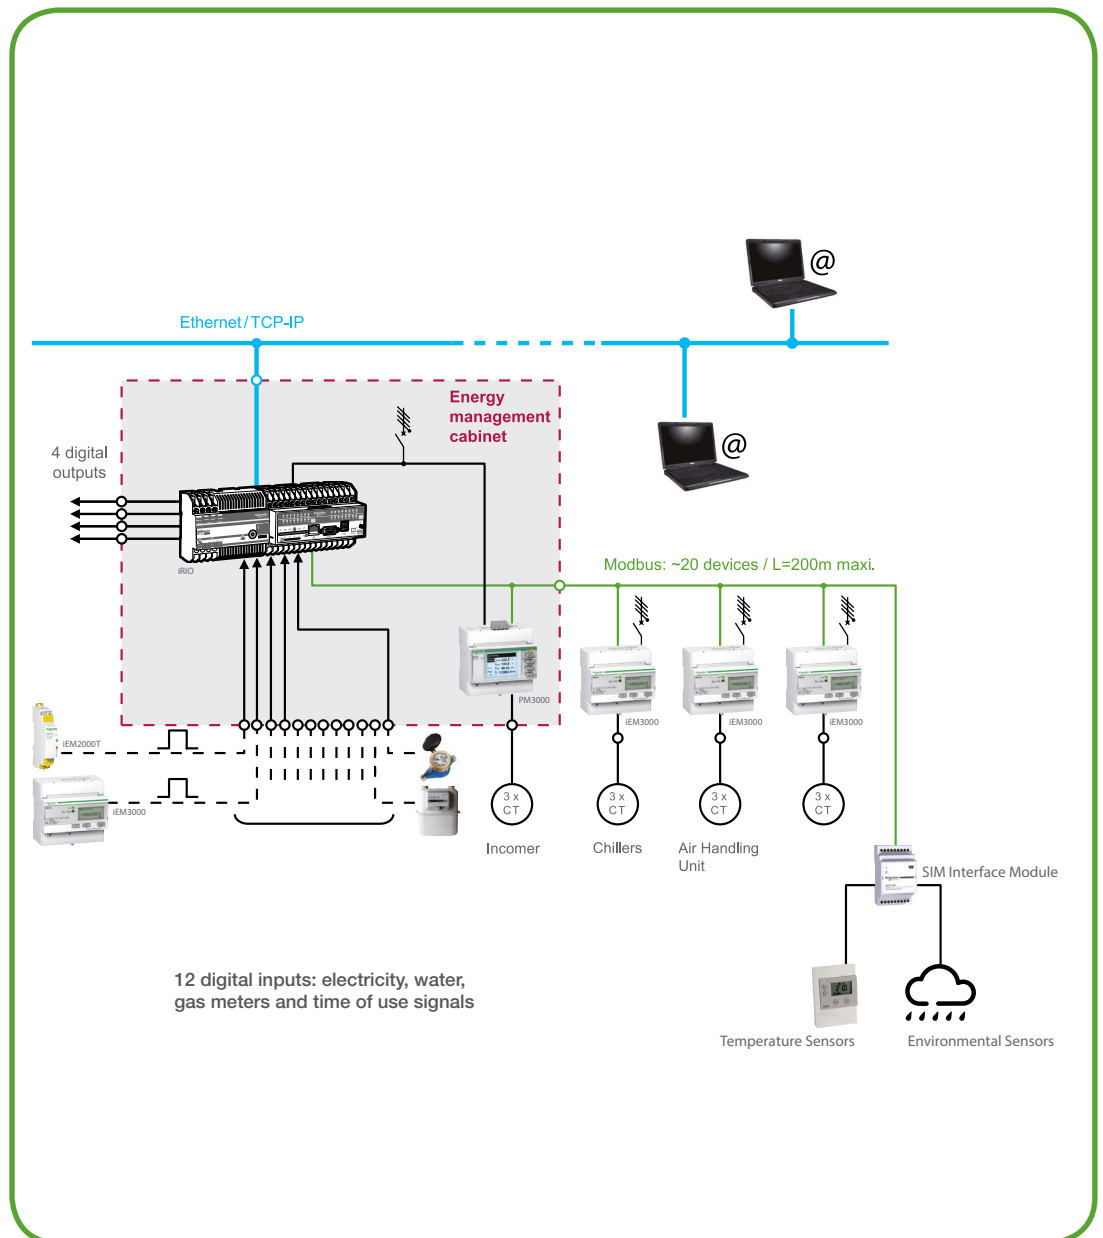

Solution

SEMS 2: Simple Energy Management Solution on-site

- Monitor all energy sources, electrical distribution and environmental parameters.
- Display building technical equipment status: load, power factor, breaker status, etc.
- Automate energy metering and reporting with customised reports as an option.
- Provide proof of savings and building energy performance.
- Implement basic control and scheduling to avoid energy wastage.
- Have alarms allowing the user to react more quickly and efficiently.
- Monitor multiple sites by adding Schneider Electric's Energy Operation hosted services.
